

About Us

Statera is a business and technology services and solutions provider that helps companies large and small optimize organizational performance by mapping strategic goals and objectives to IT initiatives. Our strategic technology solutions provide powerful insight into your organization, help you solve mission-critical problems and drive performance across the enterprise.

At Statera, our goal is to create efficiencies and balance between your people, processes and technology by facilitating collaboration, and leveraging best practices to improve existing IT investments. We provide the necessary insight and governing power for you to strategically manage and deliver on executive direction.

Solutions

Statera Solution Practice

Business Management Consulting Bridging the Gap

Statera's management consulting experts employ a proprietary Business Value Framework designed to help articulate strategy and realize the promise of strategic initiatives. Statera creates value across the enterprise by engineering solutions that bridge the gap between your people, processes, and technology. We help define goals, automate workflow, and recommend the necessary tools to help you achieve your goals and obtain a competitive advantage in the marketplace.

Infrastructure Services

Lower the Total Cost of Ownership & Improve Service Levels
Statera's Infrastructure experts can help you improve asset management, consolidation and standardization, reduce incident handling times and improve productivity. Our proven solutions help you leverage your existing infrastructure and consolidate your tools to lower the total cost of ownership. With Statera, you can improve service levels, customer satisfaction rates, reliability, availability and predictability.

Business Applications

Planning, Executing and Tracking Your Strategic Objectives to reduce TCO

Business specific applications help an organization run at the departmental level, and are meant to help achieve a set of operational objectives. Statera's business application experts help an organization promote and share data and information stored across the enterprise, enable departments to customize solutions or applications, increase efficiencies, and leverage existing IT assets. Statera designs and implements solutions that help you fully realize the potential of your business.

Platform and Integration

Making Business Better

Improving productivity with the proper application and management of technology is the key to increasing the efficiency of your workforce. Statera's productivity solutions give you the ability to streamline how your people, processes and technology work together, maximizing your unique competitive advantage and promoting your own internal best practices across your enterprise.

Managed Solutions

Managing, Securing and Optimizing your Critical Business Applications

Statera's Managed Solutions are designed to support our customers through an understanding of what is important to their business. Statera's managed solutions experts are focused on increasing value by providing and delivering solutions built to achieve your business goals. We provide our clients with a range of options including on-premise management, fully managed hosted and SaaS delivered solutions.

Expert Sourcing

Our Consultants: Some of Your Most Valuable Resources

Statera prides itself on hiring top talent. With one of the largest and most senior technical recruiting teams in the industry, our five step hiring process has been fine-tuned to provide you with the right resources for the right projects at the right price point. Each candidate is carefully screened from our personal network of over 41,000 candidates by phone, through a series of face-to-face interviews, completes a technical evaluation and is thoroughly reference and background checked. Our goal is complete satisfaction on the part of our clients and our candidates. Finding the right balance of talent is never easy - it is however, something we excel at and are passionate about. We're building Statera, one successful placement at a time.
